Our evolutionary ecosystem

At Yash Optics & Lens, we believe that evolution is the only constant.

The patients and their needs are always in our focus. We strive to meet and deliver the ever growing and changing needs ...be it presbyopia, myopia or progressive requirements. And so, we challenge ourselves continuously.

The quest to better and improvise fosters lateral and deeper thinking within our organisation. Our product team works in tandem with the marketing team, the customer care and the channel partners. This inspires us to evolve continually.

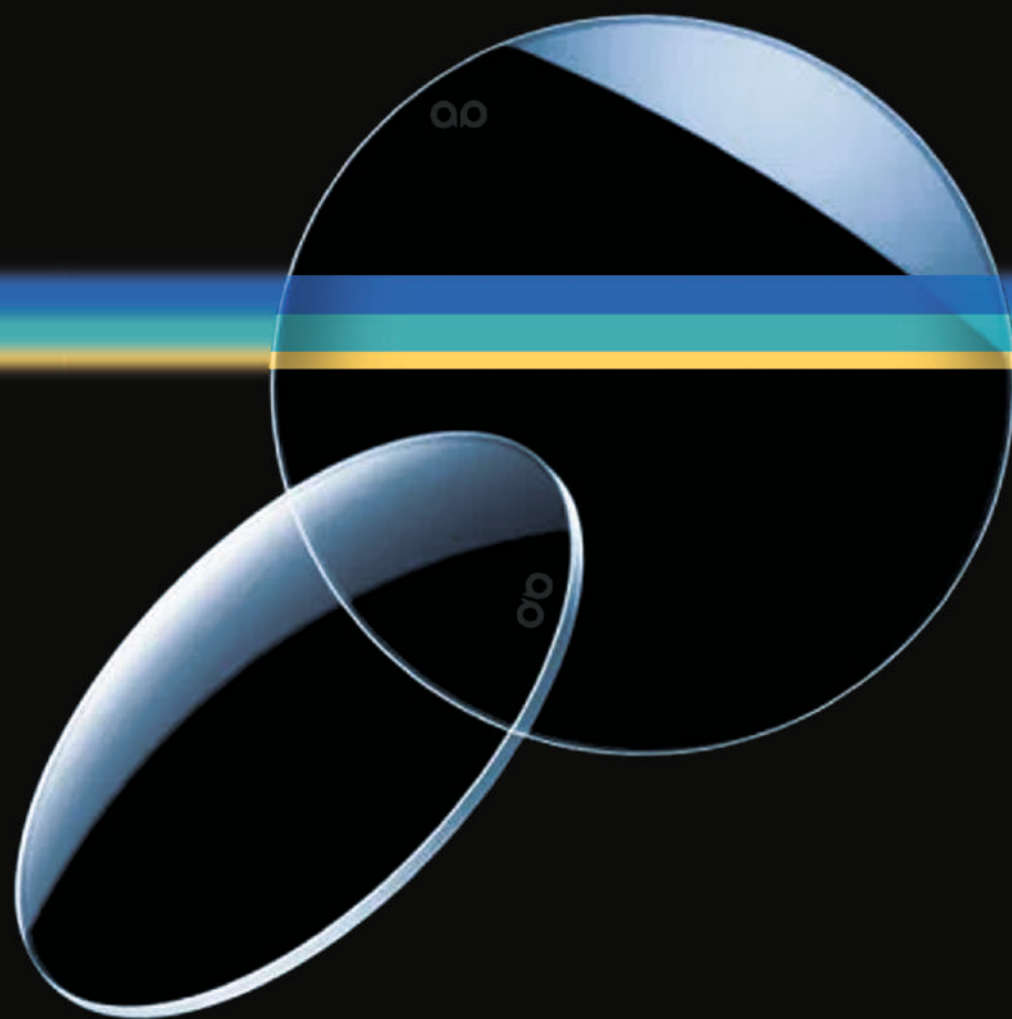

Our evolutionary methodology

The vision to procreate the best vision healthcare solutions is our guiding principle.

For those who value their lives, we value their eyes. And we are incessantly committed to giving them the best lens designs, that will elevate their sight and enhance their lives. Our product development process is robust and arduous. The wearer feedback is the starting point of our development process. We ideate and consult with ophthalmic professionals to set our objectives. And then go to task on devising the most appropriate solutions to fulfil the need of the wearers.

We pursue for the best calculations and sophisticated methods that can accomplish and wholly satisfy the purpose. We deploy our state-of-the-art facilities and the expert team in the quest. Trials are conducted on all possible solutions and meticulously recorded. The upshot is newer and innovative lens designs to gratify our users.

The wearer's delighted visual experience is our reward. Their happy eyes are the conclusion of our evolutionary pursuit of excellence.

Powered by **GERMAN TECHNOLOGY**

SeeClear Technology | UltraThin Technology | BinoSync Technology
OptiView Technology | DigiContour Technology

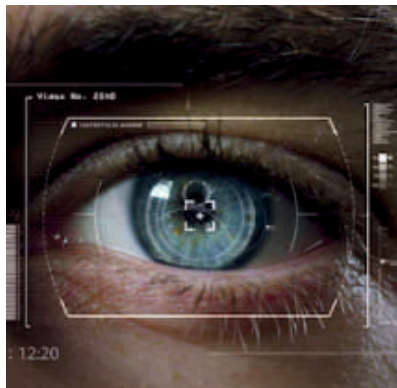

The ProSeries from Yash Optics & Len, is specially created and highly personalised lens series for professionals.

It is an evolution of 5 breakthrough technologies which takes the visual experience beyond anything available

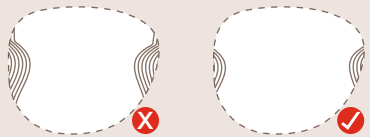

Maestr  **SeeClear Technology | UltraThin Technology | BinoSync Technology**

Maestr  **Infinite SeeClear Technology | UltraThin Technology | BinoSync Technology | OptiView Technology | DigiContour Technology**

Powered by **GERMAN TECHNOLOGY**

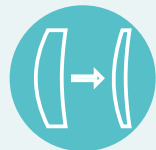

SeeClear

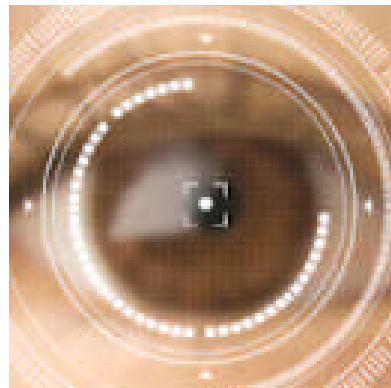

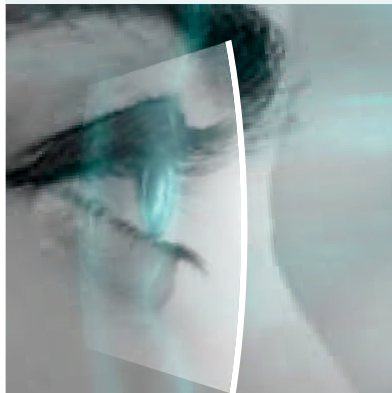

SeeClear is a breakthrough latest technology which employs innovative optimisation to enable up to 50% reduction of unwanted astigmatism or blurriness. It offers unparalleled visual fields with minimum swim effect minimization and allowing a more comfortable and ergonomic position with maximum visual acuity.

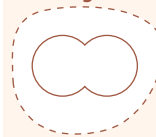

UltraThin

The highly advanced UltraThin Technology raises the bar for creating aesthetics lenses with maximum lightness. This unique technology allows for a differentiated stunning effect with minimum possible thickness and centered to real frame shape.

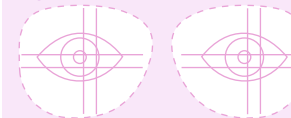

BinoSync

The BinoSync technology ensures equilibrium of unwanted astigmatism at both sides of the corridor, improving visual perception when looking sideways. This special technology balances the lenses to enable optimum binocular visualization, better blend of cross images, minimum blurriness and sharper peripheral vision.

OptiView

The OptiView technology allows the patient to get the lenses calculated and optimised for the real position of wear. It improves vision, irrespective of the frame or prescription, offering natural vision with the highest visual acuity, greater sideways field of vision (compared to a standard PAL), larger and easier reading area and optimized vision for any position of wear.

DigiContour

The DigiContour technology optimizes the lens progression by adapting the corridor design and offers comfort and sharp vision when using handheld digital devices. It enables greater vertical area with 100% of the addition, easy shift between near and far vision, avoids discomfited movements, offers comfortable viewing when reading and an ergonomic design that eliminates uncomfortable postures.

Hi-End Personalised Progressives with a Unique DNA

Maestro is a highly advanced and totally personalised progressive lens design, which employs the innovative optimisation of multiple technologies to significantly reduce unwanted astigmatism or blurriness. An extremely adaptable progressive lens, Maestro delivers the precise visual needs of presbyopes using handheld devices every day in today's digital era.

Features

- ◆ Highly balanced near and far fields of vision
- ◆ Significant reduction of up to 30% unwanted astigmatism enabled to eliminate swim effect
- ◆ Optimised progression distribution according to real frame shape
- ◆ Comfortable vision while using handheld devices in today's digital environment
- ◆ Enabled lightness of lens
- ◆ Accelerated adaptation
- ◆ Improved vision in all gaze directions
- ◆ Superior ergonomic design and aesthetics

Wavefront Technology | Uniform Binocular Technology | 4K Technology

The iSeries is designed to maximise optical experience for dynamic vision with extra wide options.

The iSeries comes with 3 superior advanced technologies

Wavefront Technology

Uniform Binocular Technology

4K Technology

Powered by **GERMAN TECHNOLOGY**

Wavefront

The advanced Wavefront Technology allows reduction of unwanted high level of aberrations and distortion from lenses and enables creation of more versatile lenses.

4K

The advanced 4K technology allows wearers to view any object in all direction of gaze. It also provides reflective crystal clear vision in any dimension.

Uniform Binocular

This new age technology enables the wearer to use both eyes together to produce unified image. It allows for comparison of information observed with each eye, judging distances more accurately and to co-ordinate eye movements for obtaining more accurate vision.

iFlex is a specially customised advanced progressive lens designed to provide wider near vision along with wide intermediate ideal for every day work. This innovative design offers highly comfortable reading zone and a wide field of view through the intermediate.

Features

- ◆ Customised for enhanced near vision
- ◆ High clarity in reading zone with full addition
- ◆ Wider reading zone and comfortable intermediate
- ◆ Maximised postural comfort
- ◆ Higher the pixel higher the resolution
- ◆ Better balance between left and right eye
- ◆ Highly refined progression to deliver excellent

Invisible Bifocal Digital Lenses for the Digital Age

Aesthetics and comfort in the new generation of bifocal lens design.

Even progressive lenses are a choice, there is still a percentage of people not using them. For those, we offer a digital bifocal solution with 2 areas of vision, for far and near vision respectively, and a smooth and invisible transition area. INVISIBLE BIFOCAI Lens is developed with the most advanced technologies to provide a perfect mix of aesthetics and quality of vision.

Ideal solution for bifocal wearers who are reluctant to use progressive lenses.

- Personalized lens that considers the real position of wear.
- Image jump minimized.
- Improved aesthetics as it eliminates the visible dividing line.

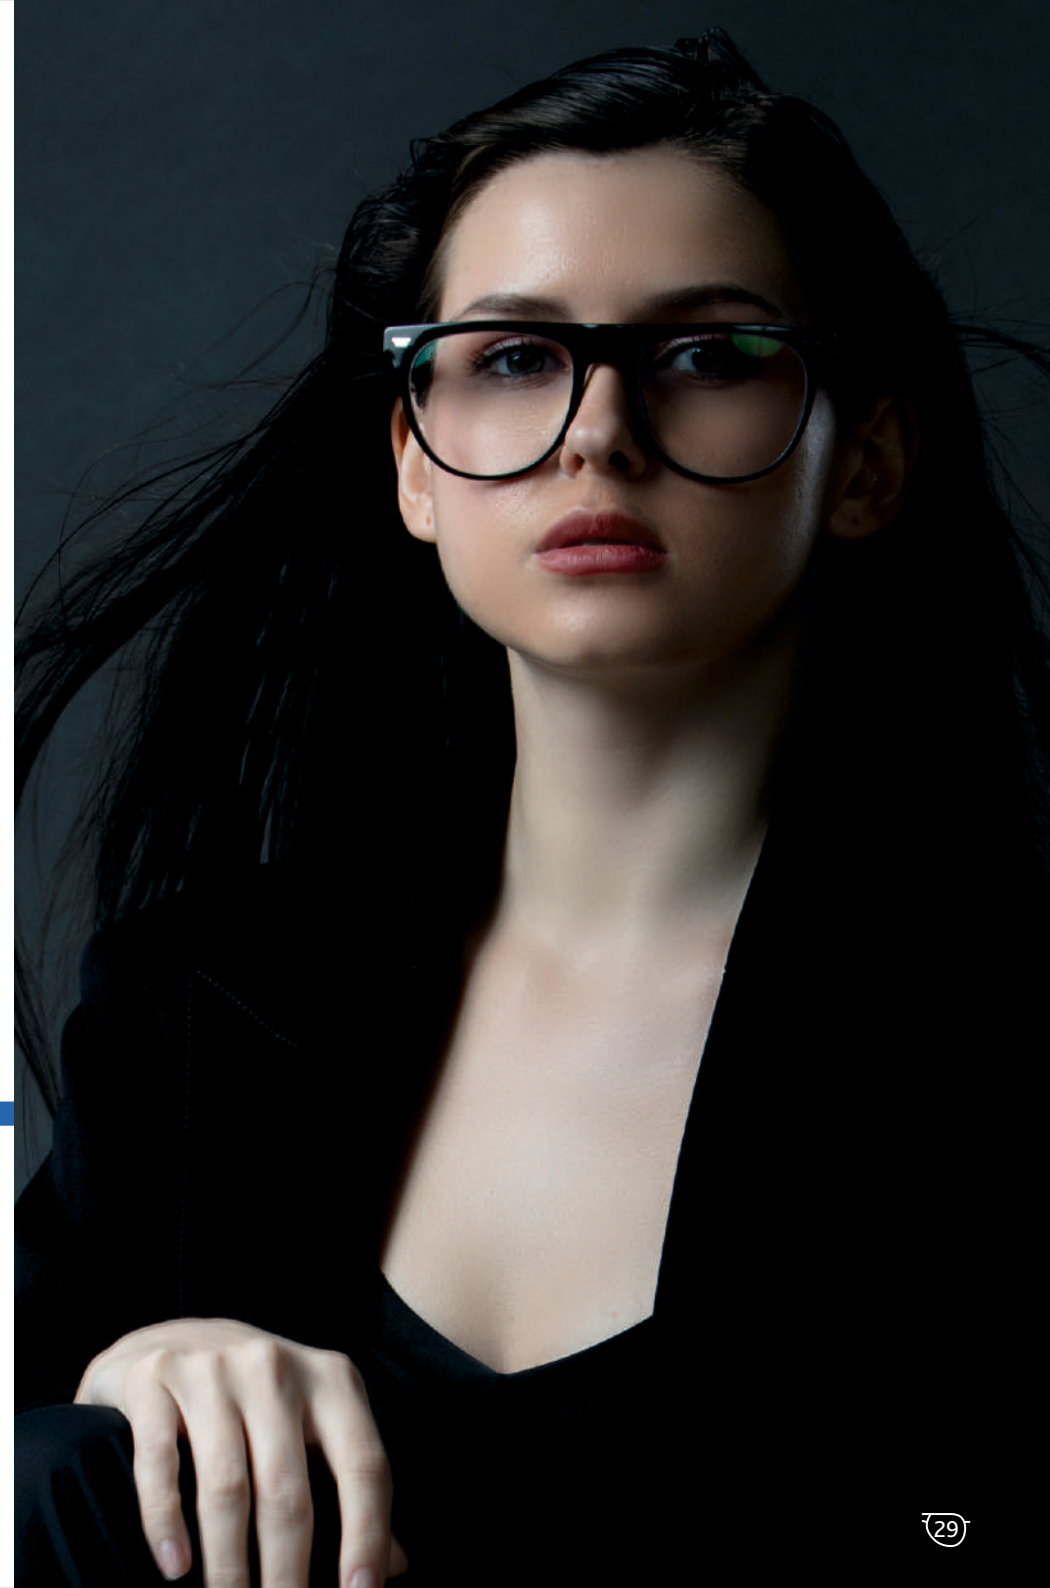

Features

- ◆ New generation bifocals for near and far vision
- ◆ Personalised lens that considers the real position of wearer
- ◆ No image jump; smooth vision shift
- ◆ Increased visual acuity
- ◆ No visible line or blend of vision zone
- ◆ Great blend of aesthetics and vision quality
