

**YASH**<sup>®</sup>

Your eyes are equally precious for us

SRP 2024

Effective from 1st March, 2024

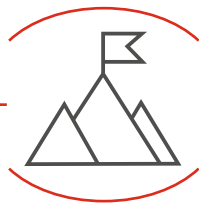

There are two kinds of diamonds in this world -  
the diamond itself and the eyes full of love!  
May your eyes be forever this diamond –  
precious and rare, flawless and eternal.  
Scintillating, captivating, glittering  
and timelessly glorious.

Twinkle twinkle beautiful little star,  
not like a diamond in the sky,  
but like your ever shining eyes.  
Because, we believe, your eyes are  
just as unique and invaluable.  
And we endeavour to keep them just that way.

### VISION

Yash O&L thrives to be the best optical solutions company from India, delivering the latest in vision healthcare, both domestically and internationally.

### MISSION

Yash O&L is fully committed to attain its vision through an unwavering adherence to its mission of employing the best cutting edge technology for delivering the best in vision healthcare solutions.

### CORPORATE PHILOSOPHY

Yash O&L pursues a single minded philosophy of valuing the precious vision of all those who value their lives; to ultimately deliver happy eyes that enable their healthy life.

### CORE VALUES

Honest Practices | Dedication & Commitment | Technology Adoption | Passion to Deliver  
| Customer Service | Vision of Growth

# YASH®

---

**Yash Optics & Lens** is the fastest emerging technology-driven optical and lens company from India. Having carved out a niche for its expertise in manufacturing optical lenses over the last 24 years, today Yash O&L stands at the forefront of delivering hi-tech digital vision healthcare solutions. Yash Optics & Lens offers the widest range of high quality digital freeform progressive lenses. From quality single vision lenses to advanced progressives lenses, customised progressive lenses to the top-of-the-line personalised progressives for professionals, and industry leading range of premium coatings.

Yash O&L is recognised for its constant technological advancement and topnotch quality. Its state-of-art manufacturing facilities at 3 locations are equipped with the latest high end machineries employing the world renowned German precision technology and processes ...to create the widest range of optometric designs and with customisations, that are easy to adapt in daily lifestyle and are best suited for varied professions.

Yash O&L is a happy close-knit family of over 350 members, whose dedicated hard work and untiring efforts for over two decades; along with committed customer service; has created more than 10.4 million satisfied consumers and is growing.

At the core of Yash Optics & Lens is its mission to offer all Indians the latest and the best in vision healthcare solutions, tailor-made for each individual's work, leisure and lifestyle. Yash O&L continually endeavors to provide superior quality products, service and technical support to its customers for creating happy eyes that enable healthy living.

Come, enter the world of Yash Optics and Lens...

---

*Happy Eyes. Healthy Life.*

## Our evolutionary ecosystem

At Yash Optics & Lens, we believe that evolution is the only constant.

The patients and their needs are always in our focus. We strive to meet and deliver the ever growing and changing needs ...be it presbyopia, myopia or progressive requirements. And so, we challenge ourselves continuously.

The quest to better and improvise fosters lateral and deeper thinking within our organisation. Our product team works in tandem with the marketing team, the customer care and the channel partners. This inspires us to evolve continually.

## Our evolutionary methodology

The vision to procreate the best vision healthcare solutions is our guiding principle.

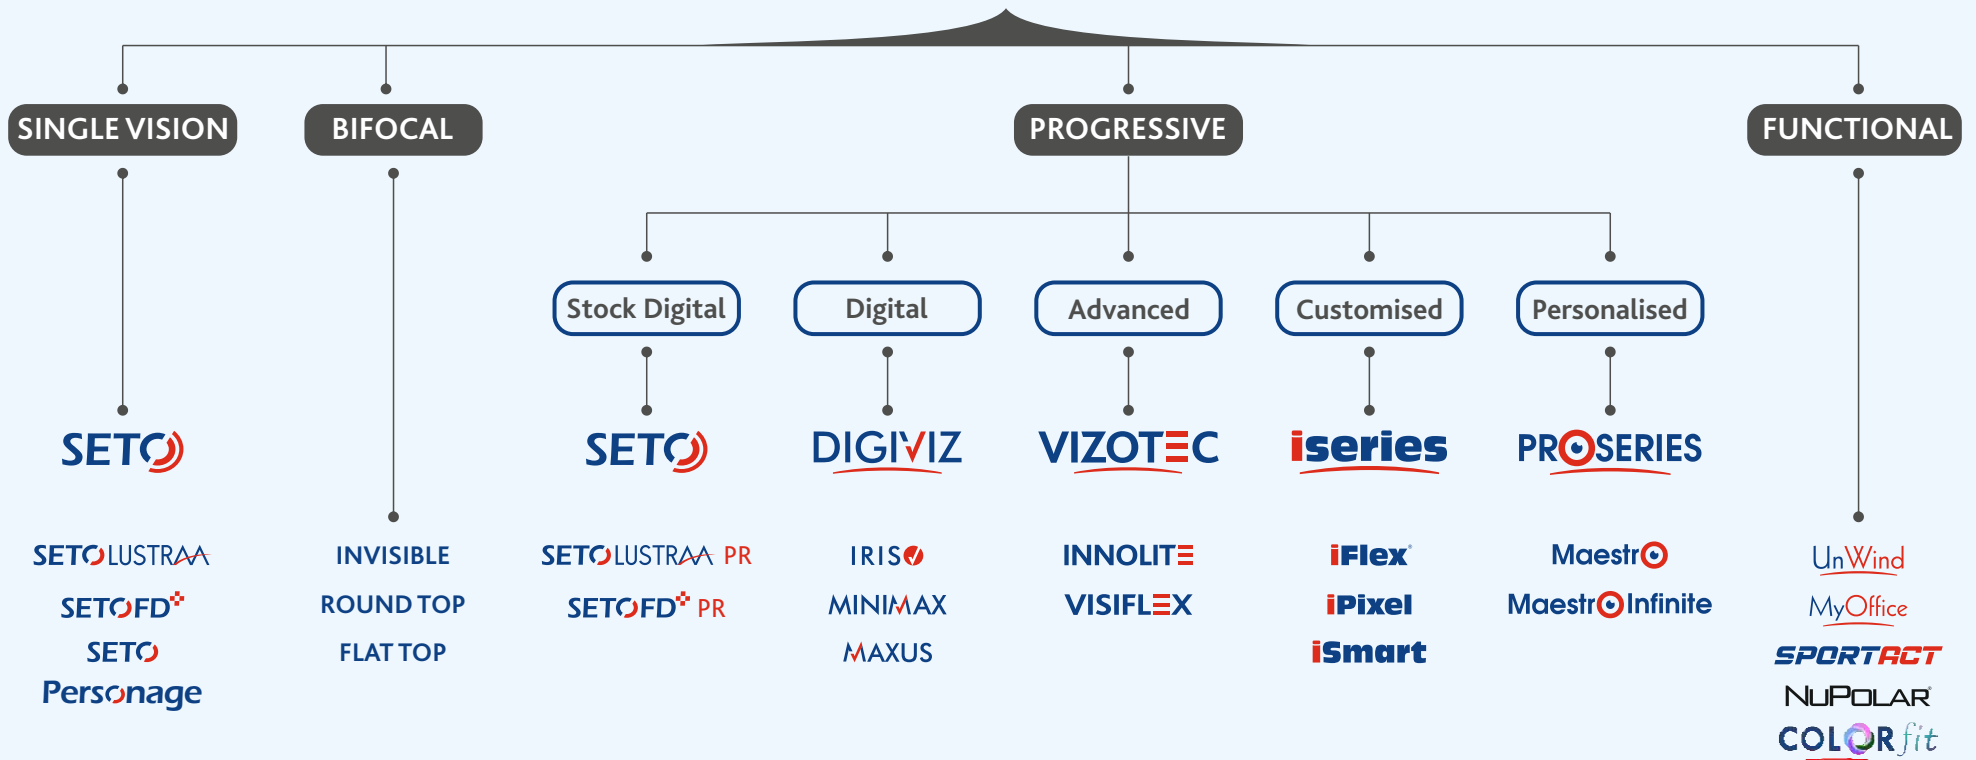

For those who value their lives, we value their eyes. And we are incessantly committed to giving them the best lens designs, that will elevate their sight and enhance their lives. Our product development process is robust and arduous. The wearer feedback is the starting point of our development process. We ideate and consult with ophthalmic professionals to set our objectives. And then go to task on devising the most appropriate solutions to fulfil the need of the wearers.

We pursue for the best calculations and sophisticated methods that can accomplish and wholly satisfy the purpose. We deploy our state-of-the-art facilities and the expert team in the quest. Trials are conducted on all possible solutions and meticulously recorded. The upshot is newer and innovative lens designs to gratify our users.

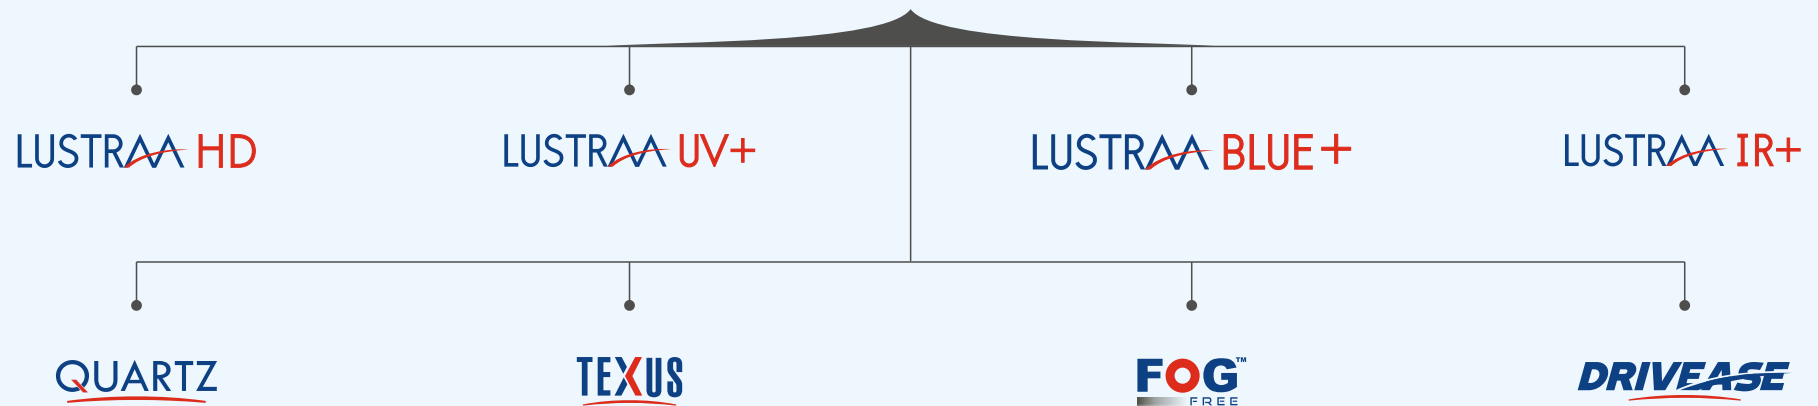

The wearer's delighted visual experience is our reward. Their happy eyes are the conclusion of our evolutionary pursuit of excellence.

# PROSERIES

Personalised Progressives  
for Professionals

The ProSeries from Yash Optics & Lens, is a specially created and highly personalised lens series for professionals. It is an evolution of 5 breakthrough technologies which takes the visual experience beyond anything available

| SeeClear Technology | UltraThin Technology | BinoSync Technology  
| OptiView Technology | DigiContour Technology

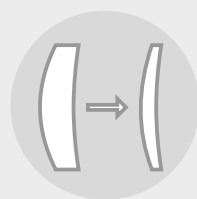

## SeeClear

SeeClear is a breakthrough latest technology which employs innovative optimisation to enable up to 50% reduction of unwanted astigmatism or blurriness.

It offers unparalleled visual fields with minimum swim effect minimization and allowing a more comfortable and ergonomic position with maximum visual acuity.

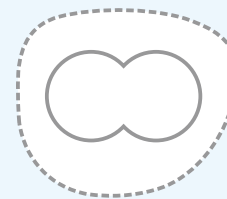

## UltraThin

The highly advanced UltraThin Technology raises the bar for creating aesthetics lenses with maximum lightness.

This unique technology allows for a differentiated stunning effect with minimum possible thickness and centered to real frame shape.

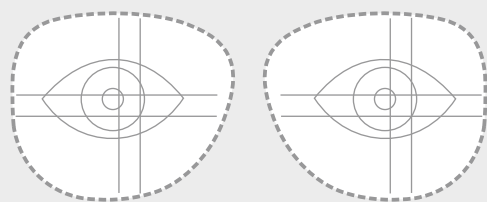

## BinoSync

The BinoSync technology ensures equilibrium of unwanted astigmatism at both sides of the corridor, improving visual perception when looking sideways.

This special technology balances the lenses to enable optimum binocular visualization, better blend of cross images, minimum blurriness and sharper peripheral vision.

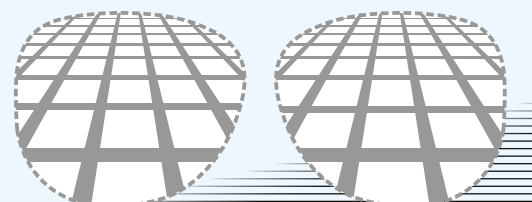

## Optiview

The OptiView technology allows the patient to get the lenses calculated and optimised for the real position of wear.

It improves vision, irrespective of the frame or prescription, offering natural vision with the highest visual acuity, greater sideways field of vision (compared to a standard PAL), larger and easier reading area and optimized vision for any position of wear.

## Digicontour

The DigiContour technology optimizes the lens progression by adapting the corridor design and offers comfort and sharp vision when using handheld digital devices.

It enables greater vertical area with 100% of the addition, easy shift between near and far vision, avoids discomfited movements, offers comfortable viewing when reading and an ergonomic design that eliminates uncomfortable postures.

Maestr  Infinite SeeClear | UltraThin | BinoSync | OptiView | DigiContour

# PROSERIES

Personalised Progressives  
for Professionals

## Maestro

Hi-End Personalised Progressives  
with a Unique DNA

### Features

- Highly balanced near and far fields of vision
- Significant reduction of up to 30% unwanted astigmatism enabled to eliminate swim effect
- Optimised progression distribution according to real frame shape
- Comfortable vision while using handheld devices in today's digital environment
- Enabled lightness of lens
- Accelerated adaptation
- Improved vision in all gaze directions
- Superior ergonomic design and aesthetics

## Maestro Infinite

Advanced Personalised Progressives with  
Breakthrough Enhancements

### Features

- Completely personalised progressive lenses that considers the real position of the user
- Widest intermediate visual field with effective natural near and far vision
- Significant reduction of up to 50% unwanted astigmatism enabled to eliminate swim effect
- Limitless visual perception
- Excellence in visual comfort
- Optimised progression distribution according to real frame shape
- Sharp vision at all distances
- Enabled lightness of lens
- Accelerated adaptation
- Improved vision in all gaze directions
- Superior ergonomic design and aesthetics

## Wavefront

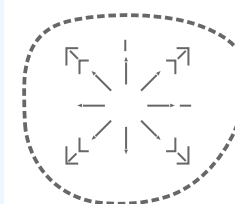

The advanced Wavefront Technology allows reduction of unwanted high level of aberrations and distortion from lenses and enables creation of more versatile lenses.

## Uniform Binocular

This new age technology enables the wearer's both eyes together to produce unified image. It allows for comparison of information observed with each eye, judging distances more accurately and to co-ordinate eye movements for obtaining more accurate vision.

## 4K

The advanced 4K technology allows wearers to view any object more sharply in all directions of gaze. It also provides reflective crystal clear vision in any dimension.

Premium Innovative Coating Range

Lenses shine with the latest innovative coatings. Eyes smile with ultimate care and protection.

Every day, your precious lenses are confronted with many unwanted challenges... Scratches, Dust, Water, Smoke, Reflection, UV Rays.

As a result, not only is your lens life reduced, but it also affects your vision clarity and tires your eyes causing eye fatigue. You need a suitable quality coating to adequately protect your lenses, and you enjoy continued comfortable viewing.

Presenting LUSTRAA range of ultimate and innovative premium coatings to deliver that exclusive protection your lenses need, and the complete eye care that you deserve.

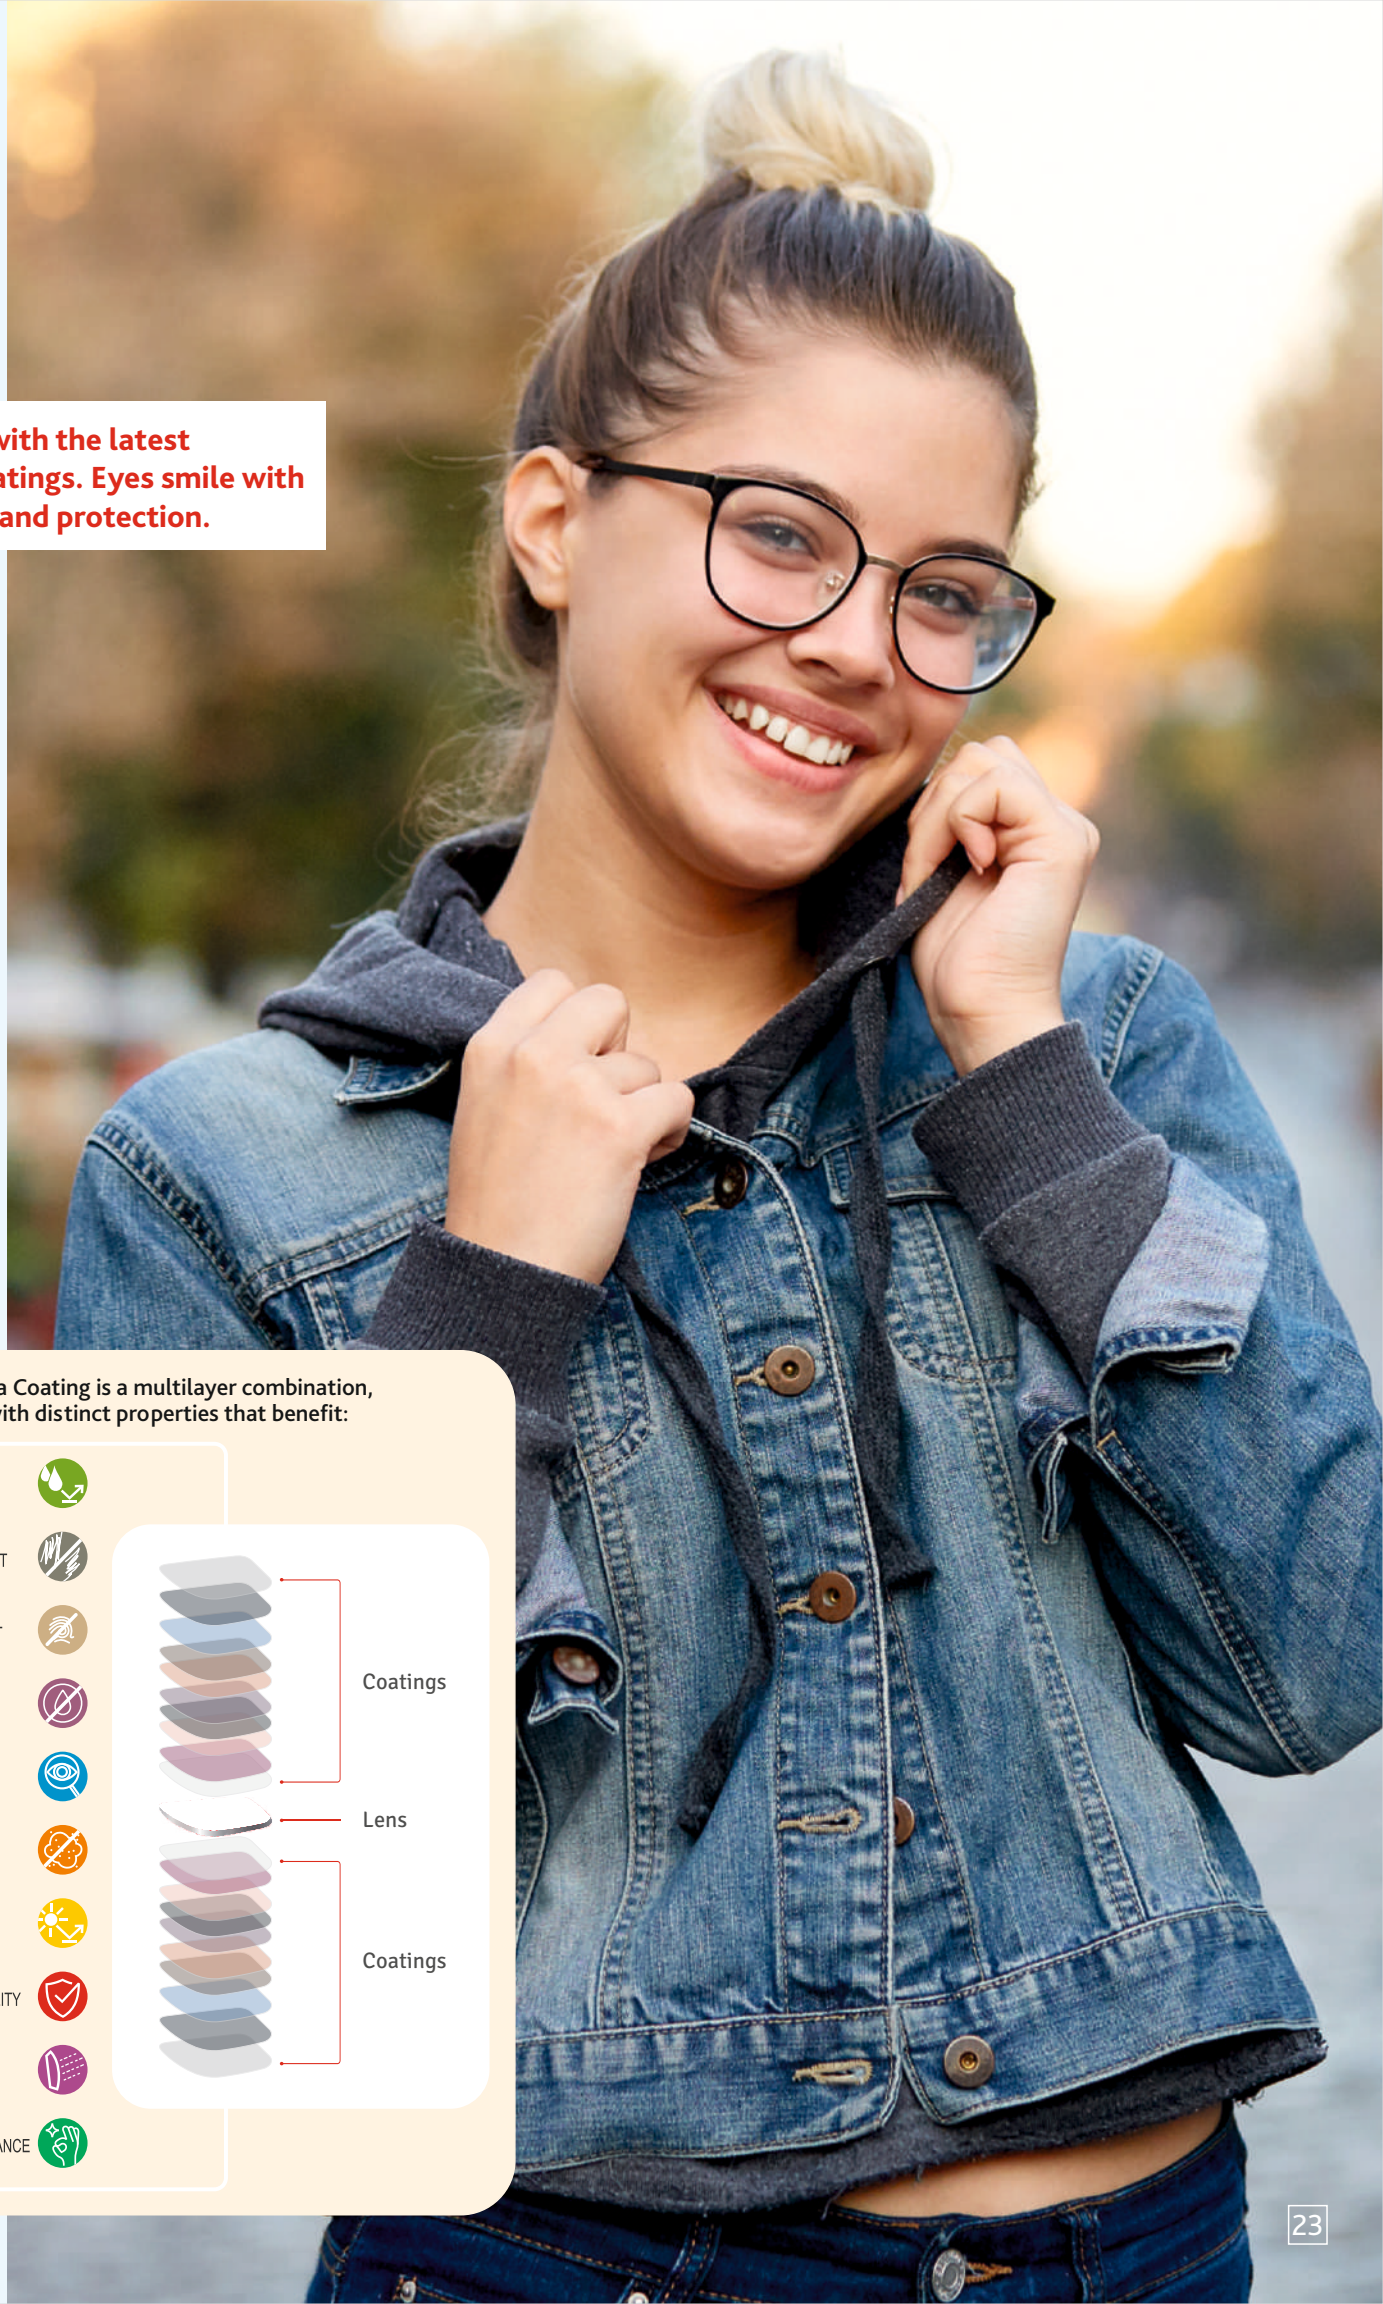

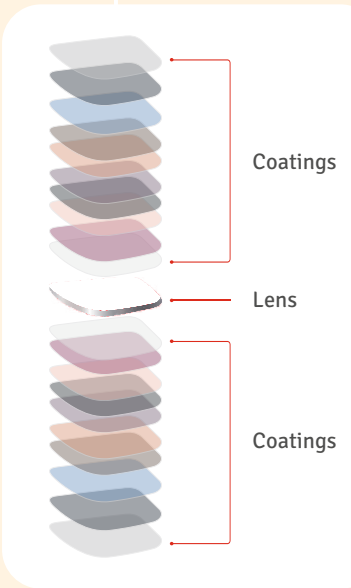

We, at Yash Optics & Lens, have always been at the forefront of innovation. Our range of value-added innovative offerings is known for its premium quality.

The Lustraa coating is available with varied attributes:

- LUSTRAA HD
- LUSTRAA UV+
- LUSTRAA BLUE+
- LUSTRAA IR+

Lustraa Coating is a multilayer combination, each with distinct properties that benefit:

- WATER REPELLENT 
- SCRATCH RESISTANT 
- SMUDGE RESISTANT 
- OIL RESISTANT 
- HD CLARITY 
- ANTI-STATIC 
- REDUCED GLARE 
- EXTENDED DURABILITY 
- BLUE BLOCK 
- COSMETIC APPEARANCE 

## LUSTRAA HD

High Definition Coating for Multiple Protection

Without Lustraa HD

With Lustraa HD

### BENEFITS WITH LUSTRAA HD COATED LENS

- Dual side multilayered coating to remove spots and ghost images
- Superhydrophobic water repellent property
- Reduced dust accumulation
- Enhanced vision clarity and durability

## LUSTRAA UV+

Maximum Protection from Harmful UV Rays

Without Lustraa UV+

With Lustraa UV+

### BENEFITS WITH LUSTRAA UV+ COATED LENS

- Filters out harmful UV light
- Provides superior UV protection
- Water & dust resistant; anti-reflection
- Excellent oleophobic coating features
- Oil & smudge repellent
- Provides crystal clear vision

## LUSTRAA BLUE+

Enhanced Visual Contrast

Without Lustraa BLUE+

With Lustraa BLUE+

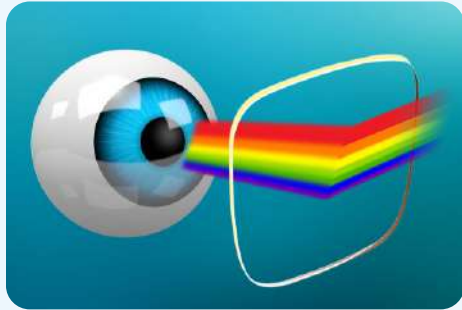

### BENEFITS WITH LUSTRAA BLUE+ COATED LENS

- Scales up the visual contrast distinctly
- Improved visual experience
- Anti-reflection to protect eyes
- Enhances cosmetic look of wearer

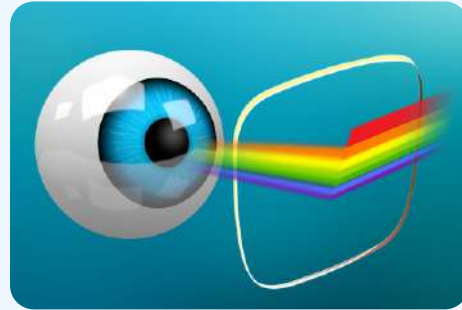

# LUSTRAA IR+

Anti-reflection Treatment from Solar Impacts

Without Lustraa IR+

With Lustraa IR+

## BENEFITS WITH LUSTRAA IR+ COATED LENS

- Optimum protection against solar impacts
- Healthier eyes with prolonged clear healthy vision
- Reduces eye fatigue and improves visual comfort
- Prevents ageing of the skin around the eyes
- Enhanced aesthetics and transparency

# DRIVEASE

Reduced Glare for More Comfortable Driving

Without DrivEase / With DrivEase

Without DrivEase / With DrivEase

## BENEFITS WITH DRIVEASE COATED LENS

- Easier, safer and more comfortable driving due to better vision, even in low light conditions
- Reduced glare at night from oncoming cars
- Accurate vision of the road, dashboard, rear view and side view mirrors

# FOG FREE

Clear Fog Free Vision in Daily Activity

Without FogFree

With FogFree

## BENEFITS WITH FOGFREE COATED LENS

- Freedom from fog, and clear vision in daily activity
- In-built fog repellent properties
- Enhanced light transmit
- Special features of hydrophobic coating
- Chemical & solvent resistant

# QUARTZ

Super Hard Coat Protection

Without Quartz

With Quartz

## **BENEFITS WITH QUARTZ COATED LENS**

- Premier quality hard coat
- The best scratch resistance and a high anti-reflective adhesion
- Ensures durability and increased longevity
- Withstands high stress environmental conditions
- Formulated for higher level of wavelength absorption

# TEXUS

Hard Coat Protection

Without Texus

With Texus

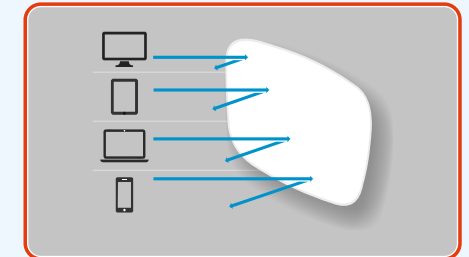

## **BENEFITS WITH TEXUS COATED LENS**

- Strictly temperature controlled process
- Optimum scratch resistance on both sides of lens
- Dust resistant
- Increased vision clarity and durability

# MATERIALS

## Blue Block

Advanced and adaptive Blue Block lenses selectively filter out the amount of harmful blue light of electronic devices from entering the eyes. They very effectively reduce eye fatigue and provide a strain-free visual experience.

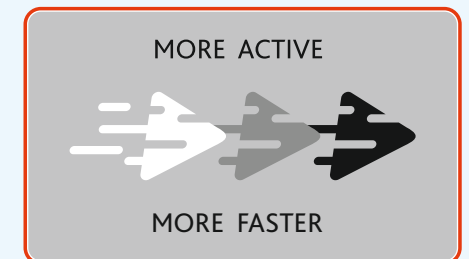

## Pro-React

Pro-React, the photochromic lenses react and adapt to changing light situations as they become progressively darker on increasing exposure to UV radiation and become clear when the radiation decreases. Pro-React offers top quality safety against glare in almost any scenario.

## PhotoFun

PhotoFun lenses are premium photochromic lens that enable faster and more active change from indoor to outdoor seamlessly and with utmost vision comfort. PhotoFun lenses are a great way to protect your eyes, visual acuity, colour contrast, visual comfort, and also blocks out harmful UV light.

## Polarised

Polarised, is a high performance material that combines clear vision with protection from reflective lights. Polarised lenses incorporate a special filter to soak up scattered light and impact of horizontal glares, and also provides the wearer with superb consolation. They extend visual clarity while lowering eyestrain, when working outdoors and also offer maximum protection for outdoor sports enthusiasts.

## MR

MR Series, is best suited for ophthalmic lenses as it offers a variety of products to provide the best solution for optical lens users. It is known as the first thiourethane based high index lens material. MR-8 are excellent optical materials with high refractive index, high Abbe value, low specific gravity and high impact resistance generated by the polymerising monomers.

## Terms & Conditions

- All prices are in ₹ Per Pair.
- Any lenses beyond (+/-) 4 Cylinder will be charged extra at ₹ 600/pair.
- All prices for Bifocals beyond addition +3.00 will be charged extra at ₹ 300/pair.
- Special base requirement will be charged extra at ₹ 300/pair.
- All lenses above the listed diameter will be charged extra at ₹ 600/pair.
- All type of uncoat lenses will be at ₹ 150/pair less than the price of Texus / Quartz pair for that lens.
- Prism price per pair will be charged extra at ₹ 300/pair for each prism.
- Any power above the mentioned power for any of the lenses will be charged extra at ₹ 300/pair.
- All products are subject to availability of finished and semi-finished lenses.
- Any defect in supply of lenses should be reported within 48 hours with an acknowledgement.
- Any problem of any lenses will not be acceptable after 10 days from the date of delivery.
- All prices remain exclusive of logistics cost, tinting & fitting charges.
- FogFree property activates with the use of FogFree cloth, provided by the Company only, on the FogFree coated lens.
- Any kind of damage on cut lens while re-coat or de-coat will be at the customer's risk.
- "\*" Marked products or prices are of our new/coming soon products.
- The Company reserves the right to revise the price and the terms at any time without prior notice.
- The Company will not be responsible for any damage on frames and job works in the transportation.
- Government levies and taxes will be extra as applicable. (GST extra).
